INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

International application No. PCTHL04/00551 Applicant IMPULSE DYNAMICS NV This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau. This international search report consists of a total of	plicant's or agent's file reference	FOR FURTHER see Form PCT/ISA/220 ACTION as well as, where applicable, item 5 below.					
This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau. This international search report consists of a total of	• • • • • • • • • • • • • • • • • • • •	nternational filing date (day/month/year)	(Earliest) Priority Date (day/month/year) 20 June 2003 (20.06.2003)				
applicant according to Article 18. A copy is being transmitted to the International Bureau. This international search report consists of a total of	•						
It is also accompanied by a copy of each prior art document cited in this report. I. Basis of the Report a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item. The international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)). b. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, see Box No. II) Certain claims were found unsearchable (See Box No. II) Unity of invention is tacking (See Box No. III) With regard to the title, the text is approved as submitted by the applicant. The text has been established by this Authority to read as follows: HEPATIC DEVICE FOR TREATMENT OR GLUCOSE DETECTION With regard to the abstract, the text is approved as submitted by the applicant. The lext has been established, according to Rule 38.2(b), by this Authority as it appears in Box No. IV. The	is international search report has been plicant according to Article 18. A cop	prepared by this International Searching y is being transmitted to the International	Authority and is transmitted to the 1 Bureau.				
a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item. The international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)). With regard to any nucleotide and/or amino acid sequence disclosed in the international application, see Box No. II) Certain claims were found unsearchable (See Box No. II) Unity of invention is lacking (See Box No. III) With regard to the title. the text is approved as submitted by the applicant. the text has been established by this Authority to read as follows: HEPATIC DEVICE FOR TREATMENT OR GLUCOSE DETECTION With regard to the abstract. the text is approved as submitted by the applicant. the text is approved as submitted by the applicant. the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box No. IV. as suggested by the applicant.							
as selected by this Authority, because the applicant failed to suggest a figure.	<u></u>						
as selected by this Authority, because this figure better characterizes the invention. none of the figures is to be published with the abstract.	, , , , , , , , , , , , , , , , , , ,		icrizes the invention.				

Form PCT/ISA/210 (first sheet) (January 2004)

INTERNATIONAL SEARCH REPORT

International application No.

PCT/IL04/00551

ROY IV TEXT OF THE ABSTRACT	(Continuation of Item 5 of the first sheet)
-----------------------------	---

A method is provided for treating a subject, including applying an electrical current to electrode device (44) attached to a helportal vein (22) of the subject, and configuring the current so as to increase glucose uptake by tissue of the subject. A method also provided, including sensing an electrical signal generated by a portoarterial glucose sensor of a subject, analyzing the sign and responsive to the analyzing, detecting eating by the subject.	15
